## “REAL” Real-time X-ray Imaging

A light-weight portable x-ray system for hand-held and robot-deployed investigation of suspect packages. Images are presented in real-time utilizing a highly sensitive x-ray video imager and a low dose CP x-ray tube.

Moving the imager around a package provides a three dimensional perspective, allowing the operator to scan a range of package sizes much more quickly and with more detail than any previously available x-ray system. A color video camera is provided to show the area of x-ray view.

Images are presented on a high-resolution 7" LCD display or on a heads-up display mounted to standard safety glasses. A solid-state video recorder with 4" LCD display provides an optional viewing station and also provides storage of inspection images in digital video or still format on Memory Stick media or mini DV tape.

## Specifications

<b>imaging area:</b>	4"x 6" field of view, continuously moveable	
<b>dimensions:</b>	Adjustable for 15" to 30" between x-ray tube and imager Inside height 21" Handle may be extended, rotated or removed. Robot attachment accessories included.
